

AGENT-READY HTML REVIEW

Review generated documents without the PDF round trip.

Select every visible component, copy stable component names, tune simple properties, and save the edits back into the source HTML.

Reviewer workflow

Component selector

Click, shift-click, or drag over rendered HTML elements to bridge agent and human references.

Live inspector

Adjust text, colors, dimensions, and inline styles for precise minor revisions.

Export with pagination

Create viewable HTML packages or PDFs using the same page settings.

Reusable blocks

Save selected components as blocks and reuse them across documents in the workspace.
